Students will explore the basic principles of biology, with particular emphasis on the molecular and cellular basis of life as well as genetics, development, evolution and ecology. Discussions on the philosophy, unifying concepts and applications/implications of biology will be included. The Honors course offers an enriched experience for accelerated students through smaller class size; a focus on the evidentiary basis of biological models; and the application of higher level critical thinking skills. Moreover, a thematic/concept-based approach to the course material will be used rather than the traditional topic-based, survey format. The laboratory component will involve completion of directed research projects that culminate in the submission and presentation of research papers, oral presentations and/or poster presentations in the appropriate scientific format. Students may not receive credit for both BIO-1 and BIO-1H. 54 hours lecture and 54 hours laboratory. (Letter grade only)

BIO-4 Human Biology

Prerequisite: None Description: A non-major introductory course in biology which offers an integrated study of the basic principles of biology as revealed in the human body. Emphasis is placed on cellular and system organization in relation to specific function and common disorders affecting the body; the interaction between the human body and its environment. Controversial, thought-provoking topics related to modern biology and medical advances involving genetic engineering will be included. This course satisfies district graduation and transfer requirements for a science lecture and laboratory course. 54 hours lecture and 54 hours laboratory. (Letter grade only)

BIO-8 Principles of Ecology

Prerequisite: None. Description: Ecology is the study of the interactions between organisms and their environment. Basic principles include evolution and natural selection, climate and other abiotic factors, population growth and genetics, community interactions, species diversity, biogeography, and biome recognition. Human impacts on the above will also be discussed. This course requires field trips. 54 hours lecture and 54 hours laboratory. (Letter grade only)

CIS-40D Systems and Network Administration									
Prerequisite: CIS-1A and CIS-25 Advisory: CIS-21 and CIS-40A Description: Build, maintain, troubleshoot and support server hardware and software technologies. Focuses on network operating system administration concepts, structure, functions, performance, and resource management is covered. Current desktop and server operating systems, such as Windows, Linux or UNIX, Mac OS are explored in this course. File and storage management techniques, system security measures, device management, and utilities in network administration and technical support procedures are examined in this course. The students will be able to identify environmental issues; understand and comply with disaster recovery and physical / software security procedures; become familiar with industry terminology and concepts of incident handling; understand server roles / specializations and interaction within the overall computing environment. 48 hours lecture and 32 hours laboratory. (Letter Grade only)									
27447	CIS-40D	Lecture	LTC	3			ON-LINE	J Bow	08/25 - 12/19/25

ETHNIC STUDIES

ETS-1 Introduction to Ethnic Studies

Prerequisite: None. Description: An introduction to the academic discipline of Ethnic Studies. Ethnic Studies is unique as an educational experience that interrogates and redefines the individual and interrelated lives of African Americans/Black, Latina/o/x/#, Chicana/o/x/#, Asian American and Pacific Islander, and Indigenous peoples in the United States (BIPOC) from their own perspectives. Students will be introduced to interdisciplinary and multidisciplinary approaches that focus on systems of violence and oppression that BIPOC communities have historically experienced in the United States. Additionally, this course shall emphasize ideologies of resistance, persistence, liberation struggle, and radical knowledge production that both confront and transform oppressive conditions and create new possibilities for social change. Students will analyze work of key theorists of race, ethnicity, de-colonization, and futurity whose work and ideas have formed the basis and tenants of Ethnic Studies. Students will be in dialogue with the creative historical work of social, sovereignty, and abolitionist movements, cultural and artistic productions, legal and public policy activists, indigenous and liberationist epistemologies, community and identity formation, and radical social and political thought. 54 hours lecture. ETS-2		Introduction to Chicanx and Latinx Studies							
Prerequisite: None Description: A survey of intersectional and interdisciplinary approaches to introduce students to the range of issues, experiences, and methodologies that form the foundation of Chicanx and Latinx Studies. By considering the relationship between the creation of "Chicanx", "Latinx" and "American" identities, students will critically reconsider the borders that constitute the U.S. as a political and cultural formation. The course balances depth and breadth in its study of the variety of perspectives and experiences that come to be associated with U.S. Chicanx and Latinx peoples. Thus, we will analyze the histories of migration and colonialism associated with predominant U.S. Latinx sub-groups, such as Mexican Americans/Chicanx people and Puerto Ricans, while also centering considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting Latinidad. Topics include the U.S./Mexico border and borderlands; immigration, migration, and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latinx urbanism; gender and sexuality; political and economic shifts; inter- and intra-group relations; and indigeneity and Blackness in Latinidad. Sources include a range of social science and humanities scholarship. 54 hours lecture. (Same as HIS-31) (Letter grade only).

ETS-7		Women of Color in the United States							
Prerequisite: None. Description: "ETS: Women of Color in the United States" is an interdisciplinary, multi-perspective comprehensive course that delves into the diverse experiences of women from four core ethnic groups in the United States: American Indian/Native American, African American/Black, Asian American, and Chicana/o/x/## or Latina/o/x/##. This course is designed to critically analyze and articulate complex concepts such as race, racism, racialization, ethnicity, equity, and intersectionality. It engages the spectrum of mainstream feminism, women of color feminism, and womanism. The course's primary focus is to provide a multi-perspective, comparative study of these women groups, emphasizing the intersectionality of race, racism, and white supremacy with aspects like class, gender, sexuality, social status, economic and political continuum. The course also underscores understanding systemic oppression and liberation, drawing from these groups' rich epistemologies, histories, cultures, and lived experiences. Students will be encouraged to actively engage with anti-racist, abolitionist, anti-colonial, and anti-imperial thought, issues, practices, and movements. The goal is to foster a deep understanding of the struggles faced by these women groups and their quest for justice, solidarity, and liberation, in the context of current and structural issues in the United States. Students will assess the contemporary experiences of women of color in the U.S. Particular attention is paid to the intersection of ethnicity, race, class, sexual orientation and gender. Students will examine history and experience through the lens of race, ethnicity, class, gender, sexual identity, and national belonging. They will challenge beliefs that women of color are a monolith by investigating archives of newspapers, magazines, zines, oral histories, popular culture, and literature reviews. They will examine contemporary works of women of color scholarship such as Gloria Anzaldua, Cherrie Moraga, Audre Lorde, Mayli Blackwell, Winona LaDuke, Amy Uyematsu, and others. The focus will be on forms of violence particularly state, cultural, discursive violence and economic injustice. Through an examination of structural, systemic, and institutionalized forms of violence against women of color, students will develop an understanding for the ways in which sexism, racism, colonialism, classism, and heterosexism intersect. They will also analyze strategies of resistance and empowerment developed by women of color. By exploring the ways in which women of color have worked for social change and demonstrated oppositional resistance, the central goal of the course will be to create a collective project demonstrating their own resistance. 54 hours lecture. (Letter grade only)

ETS-8		Introduction to Black Feminism							
Prerequisite: None. Description: An interdisciplinary, multi-perspective, critical analysis, and comparative study of Black Feminism and Womanism in the United States. The course provides an introduction to the study of Black feminism and womanism in the fields of African American Studies, Africana Studies, and Black Studies. students will examine the development and evolution of key theories, methodologies, approaches, and ideas in Black Feminism, Womanism and Black Feminist Thought. These include proto-Black feminist thinkers like Sojourner Truth (1797-1883), Josephine St. Pierre Ruffin (1842-1924), Ida B. Wells-Barnett (1862-1931), Maria W. Stewart (1803-1879), and Anna Julia Cooper (1858-1964). Topics will include activism and organizing at the turn of the century, the radical transition in Black feminism and Black feminist thought, Africana Womanism, womanist theory, the theory of intersectionality, and standpoint theory. The course will consider how Black women in the United States have challenged the intersecting effects of misogynoir, racism, sexism, classism, colonialism, homophobia, media exploitation, and other forms of social violence. Students will read major works, seminal texts, and engage in critical dialogue, and articulate their own positions concerning the basic ideas and principles of Black Feminism. The values, experience, and cultural contributions of Black feminist and/or Black womanist individuals in the United States will be identified, examined, and authenticated. 54 hours lecture. ETS-14		African American History I							
Prerequisite: None Description: A survey of the experience of Americans of African descent in America from the 1600s to 1865. The course begins with the history of African civilizations on the coast of West Africa, moves through the rise of slavery in the Americas, the origins and developments of American ideas about race, and the formation of African American culture(s) and identities. It then culminates with emancipation at the end of the Civil War. Although the history of African Americans is one of struggle and almost constant adversity, it is also one of strength and perseverance. In spite of the challenges, African Americans lived, loved, formed enduring communities, and created a unique culture. Since their involuntary arrival on the shores of North America during the early seventeenth century, Africans and their descendants confronted adversity by means of individual and collective action in numerous ways. The course explores these dimensions of the African American experience, and in so doing, highlights the multifaceted ways African Americans have made their own history while simultaneously shaping and contributing to the history of the United States. 54 hours lecture. HIS-14		African American History I							
Prerequisite: None Description: A survey of the experience of Americans of African descent in America from the 1600s to 1865. The course begins with the history of African civilizations on the coast of West Africa, moves through the rise of slavery in the Americas, the origins and developments of American ideas about race, and the formation of African American culture(s) and identities. It then culminates with emancipation at the end of the Civil War. Although the history of African Americans is one of struggle and almost constant adversity, it is also one of strength and perseverance. In spite of the challenges, African Americans lived, loved, formed enduring communities, and created a unique culture. Since their involuntary arrival on the shores of North America during the early seventeenth century, Africans and their descendants confronted adversity by means of individual and collective action in numerous ways. The course explores these dimensions of the African American experience, and in so doing, highlights the multifaceted ways African Americans have made their own history while simultaneously shaping and contributing to the history of the United States. 54 hours lecture. (Same as ETS-14) (Letter grade only)

HIS-31		Introduction to Chicanx and Latinx Studies							
Prerequisite: None Description: A survey of intersectional and interdisciplinary approaches to introduce students to the range of issues, experiences, and methodologies that form the foundation of Chicanx and Latinx Studies. By considering the relationship between the creation of "Chicanx", "Latinx" and "American" identities, students will critically reconsider the borders that constitute the U.S. as a political and cultural formation. The course balances depth and breadth in its study of the variety of perspectives and experiences that come to be associated with U.S. Chicanx and Latinx peoples. Thus, we will analyze the histories of migration and colonialism associated with predominant U.S. Latinx sub-groups, such as Mexican Americans/Chicanx people and Puerto Ricans, while also centering considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting Latinidad. Topics include the U.S./Mexico border and borderlands; immigration, migration, and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latinx urbanism; gender and sexuality; political and economic shifts; inter- and intra-group relations; and indigineity and Blackness in Latinidad. Sources include a range of social science and humanities scholarship. 54 hours lecture. (Same as ETS-2) (Letter grade only)

MAT-3 Linear Algebra									
Prerequisite: MAT-1B Description: Examines elementary vector space concepts and geometric interpretations and develops the techniques and theory to solve and classify systems of linear equations. Solution techniques include Gaussian and Gauss-Jordan elimination, Cramer's rule and inverse matrices. Investigates the properties of vectors in two, three and finite dimensions, leading to the notion of an abstract vector space. Vector space and matrix theory are presented including topics such as determinants, linear independence, bases and dimension of a vector space, linear transformations and their matrix representations, inner products, norms, orthogonality, eigenvalues, eigenvectors, and eigenspaces. Selected applications of linear algebra are included. 54 hours lecture. (Letter Grade, or Pass/No Pass option.)

MAT-39 Foundations of Calculus I									
Prerequisite: None Advisory: Intermediate Algebra. Description: An intensive course designed to provide the foundational algebra and trigonometry skills necessary for success in first-semester calculus. Classroom instruction integrates lab activities. Students cannot receive credit for MAT-39 if they have already received credit for MAT-10, MAT-9, or MAT-23. 54 hours lecture and 54 Lab hours. (Pass/No Pass only)									
27730	MAT-39	Lecture		4	MWF	08:00AM-08:50AM	SAS-306		08/25 - 12/19/25

Canvas and other online applications may be required to complete coursework.									
MAT-70A Foundations of Data Science Student									
Prerequisite: Intermediate Algebra or qualifying placement level Description: Basic programming and statistical concepts. Includes programming for data cleansing, manipulation, visualization, and statistical computation for intelligence gathering. Students will apply common built-in language functions for analysis of real-world datasets, including global and local economic data, commercial business, document collections, and social networks. Also delves into machine learning and data driven decision-making using statistical concepts like hypothesis testing, confidence intervals via bootstrapping, regression and inference for regression, and predictive modeling. Students will also learn about social issues surrounding data privacy and ownership. 54 hours lecture and 18 hours laboratory. (Letter grade or Pass/No Pass option)									
27345	MAT-70A	Lecture	ZTC	3			ON-LINE	G Florido	08/25 - 12/19/25
		Lab					ON-LINE		08/25 - 12/19/25
This is an online class with an 18-hour laboratory requirement to be completed online. Computer with Internet access required. See www.rccd.edu/de.									
MAT-70B Statistics for STEM Student									
Prerequisite: MAT-1A or qualifying placement Advisory: CIS-1A Description: An introduction to descriptive and inferential statistics, emphasizing the combined use of mathematics and programming for Data Science applications. A hands-on experience with data analysis using modern statistical software, including the interpretation of statistical findings. Topics include numerical and graphical summarization of central tendency and spread, probability, normal, binomial, and Poisson distributions. This course also addresses sampling distributions, t-distribution, the chi-squared distribution, estimation, hypothesis testing, Analysis of Variance, linear and multiple regression, and non-parametric tests. Students will work with big data and complete a research project employing simple statistical inference and advanced modeling techniques. 72 hours lecture and 18 hours laboratory. (Letter Grade, or Pass/No Pass option.)
