ETHNIC STUDIES

ETS-1 Introduction to Ethnic Studies

Prerequisite: None. Description: An introduction to Ethnic Studies offers students an overview of the core theoretical and historical foundations of the discipline, emphasizing comparative and intersectional approaches to the study of race and ethnicity in the United States and across diasporic communities of historically marginalized groups. This introduction to the interdisciplinary field of Ethnic Studies examines the historical and contemporary experiences of diverse communities of color in the United States. Students will explore how race and ethnicity are social constructs that have shaped laws, institutions, and everyday life, with a focus on African American, Native American in the United States, Asian American/Pacific Islander, and Chicana/o/x/Latina/o/x communities. Major topics include the structures of racism, white supremacy, imperialism, and colonialism, and how these systems intersect with factors like class, gender, sexuality, immigration status, and ability. Emphasis is placed on the resistance and social justice movements led by communities of color - from historical struggles for civil rights and sovereignty to contemporary movements such as Black Lives Matter and Indigenous water protectors. By centering anti-racist, decolonial, and liberation frameworks, the course empowers students to critically analyze oppression and articulate strategies for building a more equitable and just society. 54 hours lecture. Thus, we will analyze the histories of migration and colonialism associated with predominant U.S. Latina sub-groups, such as Mexican Americans/Chicana people and Puerto Ricans, while also centering considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting Latinidad. Topics include the U.S./Mexico border and borderlands; immigration, migration, and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latina urbanism; gender and sexuality; political and economic shifts; inter- and

HIST-14 African American History I									
Prerequisite: None Description: A survey of the experience of Americans of African descent in America from the 1600s to 1865. The course begins with the history of African civilizations on the coast of West Africa, moves through the rise of slavery in the Americas, the origins and developments of American ideas about race, and the formation of African American culture(s) and identities. It then culminates with emancipation at the end of the Civil War. Although the history of African Americans is one of struggle and almost constant adversity, it is also one of strength and perseverance. In spite of the challenges, African Americans lived, loved, formed enduring communities, and created a unique culture. Since their involuntary arrival on the shores of North America during the early seventeenth century, Africans and their descendants confronted adversity by means of individual and collective action in numerous ways. The course explores these dimensions of the African American experience, and in so doing, highlights the multifaceted ways African Americans have made their own history while simultaneously shaping and contributing to the history of the United States. 54 hours lecture. (Same as ETS-14) (Letter grade only)
