BIO-1H Honors General Biology

Prerequisite: None. Limitation on enrollment: Enrollment in the Honors program Description: Designed for the non-science major. Students will explore the basic principles of biology, with particular emphasis on the molecular and cellular basis of life as well as genetics, development, evolution and ecology. Discussions on the philosophy, unifying concepts and applications/implications of biology will be included. The Honors course offers an enriched experience for accelerated students through smaller class size; a focus on the evidentiary basis of biological models; and the application of higher level critical thinking skills. Moreover, a thematic/concept-based approach to the course material will be used rather than the traditional topic-based, survey format. The laboratory component will involve completion of directed research projects that culminate in the submission and presentation of research papers, oral presentations and/or poster presentations in the appropriate scientific format. Students may not receive credit for both BIO-1 and BIO-1H. 54 hours lecture and 54 hours laboratory. (Letter grade only)

| ETS-2 Introduction to Chicanx and Latinx Studies | | | | | | | | | |
| Prerequisite: None Description: A survey of intersectional and interdisciplinary approaches to introduce students to the range of issues, experiences, and methodologies that form the foundation of Chicanx and Latinx Studies. By considering the relationship between the creation of "Chicanx", "Latinx" and "American" identities, students will critically reconsider the borders that constitute the U.S. as a political and cultural formation. The course balances depth and breadth in its study of the variety of perspectives and experiences that come to be associated with U.S. Chicanx and Latinx peoples. Thus, we will analyze the histories of migration and colonialism associated with predominant U.S. Latinx sub-groups, such as Mexican Americans/Chicanx people and Puerto Ricans, while also centering considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting Latinidad. Topics include the U.S./Mexico border and borderlands; immigration, migration, and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latinx urbanism; gender and sexuality; political and economic shifts; inter- and intra-group relations; and indigeneity and Blackness in Latinidad. Sources include a range of social science and humanities scholarship. 54 hours lecture. (Same as HIS-31) (Letter grade only). | | | | | | | | | |

| ETS-7 Women of Color in the United States | | | | | | | | | |
| Prerequisite: None. Description: "ETS: Women of Color in the United States" is an interdisciplinary, multi-perspective comprehensive course that delves into the diverse experiences of women from four core ethnic groups in the United States: American Indian/Native American, African American/Black, Asian American, and Chicana/o/x/##/ or Latina/o/x/##/. This course is designed to critically analyze and articulate complex concepts such as race, racism, racialization, ethnicity, equity, and intersectionality. It engages the spectrum of mainstream feminism, women of color feminism, and womanism. The course's primary focus is to provide a multi-perspective, comparative study of these women groups, emphasizing the intersectionality of race, racism, and white supremacy with aspects like class, gender, sexuality, social status, economic and political continuum. The course also underscores understanding systemic oppression and liberation, drawing from these groups' rich epistemologies, histories, cultures, and lived experiences. Students will be encouraged to actively engage with anti-racist, abolitionist, anti-colonial, and anti-imperial thought, issues, practices, and movements. The goal is to foster a deep understanding of the struggles faced by these women groups and their quest for justice, solidarity, and liberation, in the context of current and structural issues in the United States. Students will assess the contemporary experiences of women of color in the U.S. Particular attention is paid to the intersection of ethnicity, race, class, sexual orientation and gender. Students will examine history and experience through the lens of race, ethnicity, class, gender, sexual identity, and national belonging. They will challenge beliefs that women of color are a monolith by investigating archives of newspapers, magazines, zines, oral histories, popular culture, and literature reviews. They will examine contemporary works of women of color scholarship such as Gloria Anzaldua, Cherrie Moraga, Audre Lorde, Mayli Blackwell, Winona LaDuke, Amy Uyematsu, and others. The focus will be on forms of violence particularly state, cultural, discursive violence and economic injustice. Through an examination of structural, systemic, and institutionalized forms of violence against women of color, students will develop an understanding for the ways in which sexism, racism, colonialism, classism, and heterosexism intersect. They will also analyze strategies of resistance and empowerment developed by women of color. By exploring the ways in which women of color have worked for social change and demonstrated oppositional resistance, the central goal of the course will be to create a collective project demonstrating their own resistance. 54 hours lecture. | HIS-31 | Introduction to Chicanx and Latinx Studies | | | | | | | | |
| Prerequisite: None Description: A survey of intersectional and interdisciplinary approaches to introduce students to the range of issues, experiences, and methodologies that form the foundation of Chicanx and Latinx Studies. By considering the relationship between the creation of "Chicanx", "Latinx" and "American" identities, students will critically reconsider the borders that constitute the U.S. as a political and cultural formation. The course balances depth and breadth in its study of the variety of perspectives and experiences that come to be associated with U.S. Chicanx and Latinx peoples. Thus, we will analyze the histories of migration and colonialism associated with predominant U.S. Latinx sub-groups, such as Mexican Americans/Chicanx people and Puerto Ricans, while also centering considerations of the ways in which broader populations with ties to Central America, South America, and the Caribbean play crucial roles in constituting Latinidad. Topics include the U.S./Mexico border and borderlands; immigration, migration, and diaspora; literary and cultural traditions; music and expressive practices; labor and structural inequality; social movements; Latinx urbanism; gender and sexuality; political and economic shifts; inter- and intra-group relations; and indigineity and Blackness in Latinidad. Sources include a range of social science and humanities scholarship. 54 hours lecture. (Same as ETS-2) (Letter grade only) | | | | | | | | | |
